Stephen,
Even though this reports are draft, I believe they be released.
I believe that we should go ahead and send them to Mr. Grisham (if John is OK with it), but make it clear that they are draft and subject to change and the we just started the review process. CAS

Hi Arkwood Team,

The Dioxin Risk Evaluation and Dye Trace Reports are here (attached). Please review in your respective area of expertise and send any comments (including 'no comments' if that is the case) on or by Friday, May 1, 2015.

Also, I previously sent a message regarding access to the file server that will host the lab sheets for the analytical data. There should have been an email invitation from the Chemrisk Egnyte server for that access. Please let me know if you have any issues.

9595611

Upcoming plan:

April 2015: review submitted dioxin risk eval and dye tracing reports, check analytical data

May 2015: regulators comments review/consolidation, internal discussion

June 2015: comments resolution with McKesson, path forward

Thanks,

Stephen L. Tzhone

Subject: Dioxin Reassessment Risk Evaluation and Supplemental Groundwater Tracing Study reports for Arkwood, Inc. Site, Omaha, Arkansas

Stephen,

Good afternoon. Per the approved respective work plans, attached are a transmittal letter and the Draft Dioxin Reassessment Risk Evaluation and Supplemental Groundwater Tracing Study reports for the Arkwood, Inc. Site. The analytical data and validation reports have been uploaded to and are available on the FTP site.

We have previously received the analytical data for the split samples analyzed by the EPA but would appreciate if you would upload the data validation packages for the EPA samples to the FTP site.

If you have any questions, please let me know.

Best Regards,

James Fleeer

Director, Environmental Services

McKesson Corporation
